

3D Printing

Protection

According to [this \(backup\)](#) selection guide - you need A1 protection for the resin fumes and (FF)P2 or (FF)P3 for the particles from sanding resin.

What I ended up getting was the

- [3M 6200 half-face mask](#) - 6100|small, 6200|medium, 6300|large
- [3M 6051 A1 filters](#) - 6051i version has an indicator for when the filter goes bad (this one is just 6051)
- [3M 5935 P3 particulate filters](#)
- [3M 501 pre-filter holder](#) - To attach the particulate filter to the A1 filter (these are not reusable according to 3M)
- [Cappture ES9910ST glasses](#) - to prevent resin splashing in my eyes
