Services

Public

- **Books** - Semi-public calibre-web instance of my entire digital library, guest is welcome.
- **BookStack** - This wiki
- **FreshRSS** - RSS/Atom reader - Used to be tt-rss but the developer isn't the nicest human being
- **HasteBin** - A pretty pastebin
- **PrivateBin** - A secure pastebin
- **Jitsi Meet** - Self-hosted Jitsi instance(Currently down)
- **SmokePing** - Checks and graphs latency
- **Minecraft** - minecraft.rys.pw
- **Mumble** - Running a server for Mumble VOIP (murmur)
- **Speedtest**- A speedtest on one my Scaleway VPSs. Limited to 200/200 and definitely not always reaching that, so take it with a grain of salt
- **IP detection** - I was annoyed that most sites didn't show both your IPv4, IPv6 and local IPs, so I made my own. You can curl ipv6.rys.pw or ipv4.rys.pw to get a plaintext response with your IP.
- **Protocol decode tool** - Made for my A4TECH mice
- **Text replacer** - Text Mechanic alternative
- **Radio** - Tauon Music Box lets you broadcast, so sometimes I do so
- Syncplay - syncplay.rys.pw:8999 - a SyncPlay server
- **PS3 Game Update finder** - Because the other tools are unavailable nowadays

Private

- **Keycloak** - Authentication service
- **Icinga** - Monitoring of my services
- **Mail** (**Administration**) - So I can use this domain for email

- [Matomo](#) - FOSS Google Analytics
- [Nextcloud](#) - Hosted on my own hardware - for friends/family. Can be used for file hosting, contacts, video calling, listening to music etc.
- [Wekan](#) - TODO lists

Commercial

- [Scaleway](#) - VPS
- [Private Internet Access](#) - 99$/3 years VPN
- Netflix - Paying Turkish prices
- Youtube - for listening to music and watching/uploading videos
- Deezer - For ripping most music I can find through Deezloader Remix.
