Wayland

https://wiki.archlinux.org/title/Wayland

My list of issues on Wayland -

- Flameshot can't copy into Wayland clipboard - Workaround is to use spectacle
- ~~Flameshot can't use keyboard~~ - Fixed!
- Can't run Plasma on dGPU mode on Lenovo Legion 5 Pro, it loads into a black screen
- ~~VSC needs flags to render properly~~ `code --enable-features=UseOzonePlatform --ozone-platform=wayland` - Fixed!
- Chromium flickers like crazy - this is partially caused by Chromium not defaulting to a wayland session
- Apps seem to have different clipboards? Pasting into wayland Chromium does not yield the same clipboard entry as pasting into wayland Telegram
- Apps can't claim focus so Konsole doesn't focus on launching new tabs
